

Welcome to CoronaOne!

Thanks for using CoronaOne. By collecting your own sample, you are protecting people and medical staff from infection and helping to contain Covid-19. Before you continue, you must wash your hands and put on the gloves!

This is probably the first time you have taken a specimen swab yourself. But don't worry! We've put the kit together so that you can do nothing wrong if you follow the instructions. If you have any questions, you can always call our medical support at +49 176 96400505.

Perform the test later today. Your sample will be picked up by FedEx tomorrow afternoon. After pickup, our lab will analyze the sample within the next day. Your doctor will inform you about your results and discuss the next steps.

While waiting for your findings, we ask you to remain in domestic quarantine. Thanks for doing your part to help prevent the corona pandemic!
